

Mill 1843 RG Notes

Mill, John Stuart. *A System of Logic, Ratiocinative and Inductive*.
Book III, Chapter VIII: Of the Four Methods of Experimental Inquiry
London: John W. Parker, 1843.

1 Main Idea

2 General Notes

- Two primary approaches to inquiry: Method of Agreement vs. Method of Difference:
 - Method of Agreement: If a phenomenon occurs multiple times, and in every case of its occurrence there exists some common factor

3 Important Specific Factual Claims

-

4 Connections

- See Lipset 1959: “A deviant case, considered within a context which marshals the evidence on all relevant cases, often may actually strengthen the basic hypothesis if an intensive study of it reveals the special conditions which prevented the usual relationship from appearing.” pg. 70

5 My Critiques

-
